Professional Summary

I am a tech-savvy professional with over 3+ years of experience in full-stack development, particularly excelling in JavaScript and React, Web3.js, Solidity, Rust, Go, Smart Contract Development, Solana, Ethereum, Hyperledger. My focus lies in creating exceptional user experiences through highly transactional, scalable, and optimized web applications. Throughout my career, I have consistently contributed to innovative UI solutions, driving product value while enhancing performance and user satisfaction.

I specialize in designing and integrating micro frontend architectures, leading cross functional teams to develop modular, high-performing solutions. My expertise covers the full spectrum of front-end development, from UI enhancements to ensuring seamless collaboration between design, backend, and stakeholders.

In my current role as a Lead Experience Engineer at Sequere Technology I am responsible for designing UI components that improve load times, boost engagement, and ensure superior system performance. My work includes leading frontend development initiatives, optimizing web performance, and driving project efficiency by collaborating across teams.

In previous roles, I successfully built micro frontend architectures at IPAT and Discovery OTT, and developed customer-driven interfaces at Airtel. My hands-on approach led to significant enhancements in system uptime, transactional accuracy, and user satisfaction.

Technical Skills

JavaScript (ES6+), ReactJS, Redux, HTML5, CSS3, Micro Frontend,Web3,Rust,Solana
MERN Stack, Node.js, Express.js, MongoDB , Web3.js, Solidity, Rust, Go, Smart Contract Development, Solana, Ethereum, Hyperledger
Performance tuning, Responsive design, CI/CD (Gitlab, Jenkins)

Backend & CMS**:** PHP, WordPress (Custom Theme and Plugin Development), RESTful APIs, Headless CMS Integration

Docker, Agile Methodologies, GitHub, Isomorphic React

Experience Highlights: Sequere (Feb '24 - persent): Improved page load times by 30% and user engagement by 25% through UI optimization and team coordination. Ipat(jan '23- Jan '24): Architected Micro Frontend solutions for seamless integration, achieving 99.9% system uptime.
Ezimax(oct '22 - Jan '23): Led a 25% scalability improvement with modular micro frontend solutions.

Work Experience

Full-Stack Developer | Micro Frontend Specialist

Sequere Technology | Mohali, India | Feb 2023 - Present

Developed and maintained scalable frontend applications using React.js and Next.js. - Improved website performance, reducing load time by 30% through optimized asset loading and efficient API calls.
Designed and implemented interactive UI components, ensuring an intuitive user experience.
Integrated RESTful APIs and enhanced cross-browser compatibility for a seamless Projects

Crypto Trading App

React Native, Expo, API Integration

- Developed a mobile app for seamless cryptocurrency trading.
- Integrated real-time market price tracking using API.
- Implemented secure user authentication and transaction processing.

Yatter.io (AI-based Media Generation Platform)

React, Next.js, Node.js, RESTful APIs

- Built an interactive platform for AI-generated scripts and media.
- Integrated AI to generate random images and convert them into short videos.
- Developed an intuitive and user-friendly interface for seamless user experience.

Movie Generator App (IMDb Data Integration)

React, MongoDB, RESTful APIs
- Designed and developed a movie search application integrated with IMDb data.
- Implemented API calls to dynamically fetch and display movie ratings and reviews.
- Ensured optimal app performance with efficient data handling techniques.

Education

Bachelor of Technology | Greater Noida Institute of Technology | 2020 – 2023

Diploma in Engineering | ARKA JAIN UNIVERSITY | 2017 – 2020

Certifications & Achievements

Won 'Best Research Award' for sentiment analysis in final year project.

'Best Project Award' for outstanding group project.

Rookie Award – Best Performer of the Year.
